

## Intermediate Widespread Hangers for Hutch 9700 TWS

Fabricated Versions of our Straddlemount and Undermount

### Our newly-designed intermediate widespread hangers

add another option to the Hutch 9700 product line of suspensions. The new designs are fabricated versions of our 16180-01 (straddlemount) and our 16181-01 (undermount) cast intermediate widespread hangers.

- Hutch fabricated intermediate widespread hangers offer a lower cost option, with no weight penalty, for our 54.5" through 81" widespread axle spacings.
- The fabricated extension of our undermount hanger has a slightly different "footprint" than the cast version. Please check to ensure that it will work for your particular application.

If you have any questions or would like more details about the new Fabricated Intermediate Widespread Hangers, please contact your Hutchens Regional Manager, Customer Service Representative or our Engineering Department.
